1 Always carry me in a CSS that is right for my weight and height, even if the trip is short

2 When you help me get in or out of the vehicle, always do it from the side closest to the sidewalk, but first remember to brake my pram or pushchair

3 In the pushchair, always fasten my safety harness, as a small bump against the kerb might make me fall

4 Do not advance the pushchair in the crossing, show me that I must cross only when the light is green or in the pedestrian crossing, and never between cars

5 Respect these rules even if I am not with you, because my schoolmates also learn from your actions the same way I learn from the actions of other families

6

When you bring me or come pick me up, look for an authorized parking spot; remember this is a school, and there are many children and families each minding their own, so it would be much better if we are all civilized

7

Being in a rush and road safety are not compatible, my protection and road-safety education are well worth 5 minutes

8

Rain is not bad, it does not matter if we have to walk a bit under an umbrella or a light rain, it is not really necessary to park in front of the school, and remember to close the umbrella before entering or exiting to avoid obstructing passage to others

9

All things can be improved, so if you notice any road-safety risk for children near school, do not hesitate and inform about it. It is better to suggest solutions than just criticizing things and increasing risks

10

And remember: **EVERYTHING** that you do now for my safety and civic education will be transformed into self-protection and good practices when I grow up
